Contents to Volume 119 (1999)

Volume 119, No. 1, October 1999

Ken Ono: Indivisibility of Class Numbers of Real Quadratic Fields 1–11
R. Parimala, R. Sridharan and Maneesh L. Thakur: Tits' Constructions of Jordan Algebras and F_4 Bundles on the Plane 13–40
Xiaotao Sun: Remarks on Semistability of G-Bundles in Positive Characteristic 41–52
Colin J. Bushnell and Philip C. Kutzko: Semisimple Types in GL_n 53–97
Changchang Xi: Partition Algebras are Cellular 99–109

Volume 119, No. 2, November 1999

Neil Dummigan: Complete p-Descent for Jacobians of Hermitian Curves 111–132
T. Chinburg, M. Kolster, G. Pappas and V. Snaith: Nearly Perfect Complexes and Galois Module Structure 133–155
Terence Gaffney: Fibers of Polynomial Mappings at Infinity and a Generalized Malgrange Condition 157–167
A. P. Rao: Mathematical Instantons in Characteristic Two 169–184
Claudia Polini and Bernd Ulrich: Necessary and Sufficient Conditions for the Cohen–Macaulayness of Blowup Algebras 185–207
C. G. Zaal: A Complete Surface in M_6 in Characteristic > 2 209–212
J. Biswas and V. Srinivas: Roitman's Theorem for Singular Projective Varieties 213–237

Volume 119, No. 3, December 1999

Brian Conrad: Finite Group Schemes over Bases with Low Ramification 239–320
Christopher D. Hacon: Divisors on Principally Polarized Abelian Varieties 321–329
Shih-Tsai Feng and Georg Schumacher: On the Diameter of Plane Curves 331–334
Dipendra Prasad: Distinguished Representations for Quadratic Extensions 335–345
